

APPENDIX B. SELECTED SUPPLIERS OF EQUIPMENT AND SERVICES

This appendix lists some of the companies which supply equipment, supplies or services to western Alaska fish processing companies or who are processors themselves. Many of these companies helped to supply information for this handbook. While they are by no means the only companies you may wish to work with, they may be a good starting point to contact for information as you plan your processing plant.

Many of these companies have websites which provide extensive information about their products or services. These websites can usually be found by doing an internet search on the company name.
