About the Symposium

About This Proceedings

The Lowell Wakefield Symposium Series

Tools for Analysis

Spatial Modeling of Fish Habitat Suitability in Florida Estuaries

Peter J. Rubec, Steven G. Smith, Michael S. Coyne, Mary White, Andrew Sullivan, Timothy C. MacDonald, Robert H. McMichael Jr., Douglas T. Wilder, Mark E. Monaco, and Jerald S. Ault

Recent Approaches Using GIS in the Spatial Analysis of Fish Populations

Tom Nishida and Anthony J. Booth

Using GIS to Analyze Animal Movements in the Marine Environment

Philip N. Hooge, William M. Eichenlaub, and Elizabeth K. Solomon

Modeling Approaches

A Conceptual Model for Evaluating the Impact of Spatial Management Measures on the Dynamics of a Mixed Fishery

Dominique Pelletier, Stéphanie Mahévas, Benjamin Poussin, Joël Bayon, Pascal André, and Jean-Claude Royer

Evaluating the Scientific Benefits of Spatially Explicit Experimental Manipulations of Common Coral Trout (*Plectropomus leopardus*) Populations on the Great Barrier Reef, Australia

Andre E. Punt, Anthony D.M. Smith, Adam J. Davidson, Bruce D. Mapstone, and Campbell R. Davies

Spatial Modeling of Atlantic Yellowfin Tuna Population Dynamics: Application of a Habitat-Based Advection-Diffusion-Reaction Model to the Study of Local Overfishing

Olivier Maury, Didier Gascuel, and Alain Fonteneau

Integrated Tagging and Catch-at-Age Analysis (ITCAAN):
Model Development and Simulation Testing

Mark N. Maunder

Toward an Environmental Analysis System to Forecast
Spawning Probability in the Gulf of California Sardine

*S.E. Lluch-Cota, D. Kiefer, A. Parés-Sierra, D.B. Lluch-Cota,
J. Berwald, and D. Lluch-Belda*

**Patterns in Life History
and Population Parameters**

Ocean Current Patterns and Aspects of Life History
of Some Northwestern Pacific Scorpaenids

Alexei M. Orlov

Comparative Spawning Habitats of Anchovy
(*Engraulis capensis*) and Sardine (*Sardinops sagax*)
in the Southern Benguela Upwelling Ecosystem

*C.D. van der Lingen, L. Hutchings, D. Merkle,
J.J. van der Westhuizen, and J. Nelson*

Spatially Specific Growth Rates for Sea Scallops
(*Placopecten magellanicus*)

*Stephen J. Smith, Ellen L. Kenchington, Mark J. Lundy,
Ginette Robert, and Dale Roddick*

Spatial Distribution and Recruitment Patterns of
Snow Crabs in the Eastern Bering Sea

Jie Zheng, Gordon H. Kruse, and David R. Ackley

Yelloweye Rockfish (*Sebastes ruberrimus*) Life
History Parameters Assessed from Areas with
Contrasting Fishing Histories

Allen Robert Kronlund and Kae Lynne Yamanaka

Spatial Distributions of Populations

Distribution Patterns and Survey Design Considerations
of Pacific Ocean Perch (*Sebastes alutus*) in the Gulf of Alaska

*Chris Lunsford, Lewis Haldorson, Jeffrey T. Fujioka, and
Terrance J. Quinn II*

Spatial Inferences from Adaptive Cluster Sampling
of Gulf of Alaska Rockfish

*Dana H. Hanselman, Terrance J. Quinn II, Jonathan Heifetz,
David Clausen, and Chris Lunsford*

Contents

Evaluating Changes in Spatial Distribution of Blue King Crab near St. Matthew Island

Ivan Vining, S. Forrest Blau, and Doug Pengilly

Density-Dependent Ocean Growth of Some Bristol Bay Sockeye Salmon Stocks

Ole A. Mathisen and Norma Jean Sands

Evidence of Biophysical Coupling from Shifts in Abundance of Natural Stable Carbon and Nitrogen Isotopes in Prince William Sound, Alaska

Thomas C. Kline Jr.

Relationships with the Physical Environment

Classification of Marine Habitats Using Submersible and Acoustic Seabed Techniques

John T. Anderson

Environmental Factors, Spatial Density, and Size Distributions of 0-Group Fish

Boonchai K. Stensholt and Odd Nakken

Spatial Distribution of Atlantic Salmon Postsmolts: Association between Genetic Differences in Trypsin Isozymes and Environmental Variables

Krisna Rungruangsak-Torrissen and Boonchai K. Stensholt

Critical Habitat for Ovigerous Dungeness Crabs

Karen Scheduling, Thomas Shirley, Charles E. O'Clair, and S. James Taggart

Large-Scale Long-Term Variability of Small Pelagic Fish in the California Current System

Rubén Rodríguez-Sánchez, Daniel Lluch-Belda, Héctor Villalobos-Ortiz, and Sofia Ortega-García

Spatial Distribution and Selected Habitat Preferences of Weathervane Scallops (*Patinopecten caurinus*) in Alaska

Teresa A. Turk

Species Interactions

Spatial Dynamics of Cod-Capelin Associations off Newfoundland

Richard L. O'Driscoll and George A. Rose

Spatial Patterns of Pacific Hake (*Merluccius productus*)
Shoals and Euphausiid Patches in the California
Current Ecosystem

Gordon Swartzman

Spatial Patterns in Species Composition in the Northeast
United States Continental Shelf Fish Community
during 1966-1999

Lance P. Garrison

Patterns in Fisheries

An Empirical Analysis of Fishing Strategies
Derived from Trawl Logbooks

David B. Sampson

Distributing Fishing Mortality in Time and
Space to Prevent Overfishing

Ross Claytor and Allen Clay

In-Season Spatial Modeling of the Chesapeake Bay
Blue Crab Fishery

Douglas Lipton and Nancy Bockstael

Territorial Use Rights: A Rights Based Approach
to Spatial Management

Keith R. Criddle, Mark Herrmann, and Joshua A. Greenberg

Marine Protected Areas and Experimental Management

Sanctuary Roles in Population and Reproductive
Dynamics of Caribbean Spiny Lobster

Rodney D. Bertelsen and Carrollyn Cox

Efficacy of Blue Crab Spawning Sanctuaries in Chesapeake Bay

*Rochelle D. Seitz, Romuald N. Lipcius, William T. Stockhausen,
and Marcel M. Montane*

Simulation of the Effects of Marine Protected Areas
on Yield and Diversity Using a Multispecies,
Spatially Explicit, Individual-Based Model

Yunne-Jai Shin and Philippe Cury

Contents

A Deepwater Dispersal Corridor for Adult Female
Blue Crabs in Chesapeake Bay

*Romuald N. Lipcius, Rochelle D. Seitz, William J. Goldsborough,
Marcel M. Montane, and William T. Stockhausen*

Managing with Reserves: Modeling Uncertainty in
Larval Dispersal for a Sea Urchin Fishery

Lance E. Morgan and Louis W. Botsford

Reflections on the Symposium “Spatial Processes and
Management of Marine Populations”

Dominique Pelletier
