Keynote Address

Living Marine Resource Assessment for the 21st Century: What Will Be Needed and How Will It Be Provided? <i>Keith Sainsbury</i>	1
---	---

Data Issues and Model Specification

Evaluation of the Status of Fisheries Data Collection and Stock Assessment Problems in São Paulo, Southeastern Brazil <i>Maria de los Angeles Gasalla and Acácio Ribeiro Gomes Tomás</i>	41
Evaluation of CPUE Estimates for the 1995 Crab Fisheries of the Bering Sea and Aleutian Islands Based on Observer Data <i>Laurence C. Byrne and Douglas Pengilly</i>	61
Catch and Effort Analysis with Uncertain Stock and Effort Dynamics: Southern Bluefin Tuna Longline <i>Robert Campbell</i>	75
Stock Production Models of Blue Marlin and White Marlin in the Atlantic Ocean: A Case History <i>Christopher D. Jones, Eric D. Prince, Gerald P. Scott, and Mark I. Farber</i>	99
Evaluation of Multiple Survey Indices in Assessment of Black Sea Bass from the U.S. South Atlantic Coast <i>Douglas S. Vaughan, Boxian Zhao, Mark R. Collins, John C. McGovern, and H. Scott Meister</i>	121

An Index for Weighting Results in Catch-at-Age Models Based on Diagnostic Tests for Lack of Fit <i>T. Polacheck, K.A. Haskard, N. Klaer, A. Betlehem, and A. Preece</i>	137
An Integrated Assessment of Southern Blue Whiting (<i>Micromesistius australis</i>) from New Zealand Using Separable Sequential Population Analysis <i>Stuart Hanchet, Vivian Haist, and Dave Fournier</i>	155
Statistics, Software, and Fish Stock Assessment <i>Jon T. Schnute, Laura J. Richards, and Norm Olsen</i>	171
A Statistical Framework for Analysis of Limit Reference Points <i>Laura J. Richards, Jon T. Schnute, and Norm Olsen</i>	185
Joint Time Series Analysis of Catch-at-Age and CPUE Data <i>Gudmundur Gudmundsson</i>	199
Dynamics of a Migratory Fish Population with Applications to the Management of Sablefish <i>Jonathan Heifetz and Terrance J. Quinn II</i>	219
Stock Assessment of Gemfish (<i>Rexea solandri</i>) in Eastern Australia Using Maximum Likelihood and Bayesian Methods <i>Anthony D.M. Smith and André E. Punt</i>	245
Forecast Methods for Inseason Management of the Southeast Alaska Chinook Salmon Troll Fishery <i>Jerome J. Pella, Michele M. Masuda, and D.G. Chen</i>	287
A Monte Carlo Evaluation of the Stock Synthesis Assessment Program <i>David B. Sampson and Yanshui Yin</i>	315
Fuzzy Regression in Fisheries Science: Some Methods and Applications <i>Saul B. Salla and Scott Ferson</i>	339
Evaluation of Assumed Error Structure in Stock Assessment Models That Use Sample Estimates of Age Composition <i>Paul R. Crone and David B. Sampson</i>	355
A Parametric Bootstrap of Catch-Age Compositions Using the Dirichlet Distribution <i>Erik H. Williams and Terrance J. Quinn II</i>	371
Some Intrinsic Limitations of Sample Variances in Stock Assessment Models <i>Clay E. Porch</i>	385

Diagnosing Systematic Errors in Reported Fishery Catch <i>Stratis Gavaris and Lutgarde Van Eeckhaute</i>	399
Model Misspecification or Data Bias: The Assessment of Prince Rupert Herring <i>Jacob F. Schweigert</i>	413
A Stochastic Implementation of an Age-Structured Production Model <i>Victor R. Restrepo and Christopher M. Legault</i>	435
When Lengths Are Better Than Ages: The Complex Case of Bocaccio <i>Stephen Ralston and James N. Ianelli</i>	451
Integrated Catch-Age Mark-Recapture Model: Application to B.C. Sablefish Stocks <i>Vivian Haist</i>	469
Integrating Ecosystem Studies: A Bayesian Comparison of Hypotheses <i>Milo D. Adkison, Brenda Ballachey, James Bodkin, and Leslie Holland-Bartels</i>	495
Assessment of Southeast Alaska Pink Salmon Abundance Based on Commercial Catch and Effort and Sex Ratio Data <i>Jie Zheng and Ole A. Mathisen</i>	511
Stage-Structured and Size-Based Applications	
Progress and Problems in the Application of Management Procedures to South Africa’s Major Fisheries <i>José A.A. De Oliveira, Douglas S. Butterworth, and Susan J. Johnston</i>	513
A Length-Based Population Model for Hard-to-Age Invertebrate Populations <i>Terrance J. Quinn II, Clive T. Turnbull, and Caihong Fu</i>	531
Coping with a Challenging Stock Assessment Situation: The Kamishak Bay Sac-Roe Herring Fishery <i>Edward O. Otis, William R. Bechtol, and Wesley A. Bucher</i>	557
Abundance Estimation of St. Matthew Island Blue King Crabs Using Survey and Commercial Catch and Effort Data <i>J. Zheng, M.C. Murphy, and G.H. Kruse</i>	575
Using Multiple Data Sets to Assess Red King Crab in Norton Sound, Alaska: Length-Based Stock Synthesis <i>Jie Zheng, Gordon H. Kruse, and Lowell Fair</i>	591

Treatment of Data and Model Uncertainties in the Assessment of Southern Bluefin Tuna Stocks <i>Tom Polacheck, Ann Preece, Andrew Betlehem, and Neil Klaer</i>	613
Virtual Population Analysis with the Adjoint Method <i>M.J. Huiskes</i>	639
Examination of a Length-Based Population Analysis <i>Takashi Matsuishi</i>	659
Ocean Ecosystems	
Incorporation of Predation into a Population Assessment Model of Eastern Bering Sea Walleye Pollock <i>Patricia A. Livingston and Richard D. Methot</i>	663
Problems with an Environmental-Based Recruitment Index: Examples from a New Zealand Snapper Assessment (<i>Pagrus auratus</i>) <i>Mark N. Maunder</i>	679
Cross-Validation of Trophic Level Estimates from a Mass-Balance Model of Prince William Sound Using ¹⁵N/¹⁴N Data <i>Thomas C. Kline Jr. and Daniel Pauly</i>	693
Calculating Capelin Consumption by Icelandic Cod Using a Spatially Disaggregated Simulation Model <i>Höskuldur Björnsson</i>	703
Spatial Analysis of Fish Distribution and Abundance Patterns: A GIS Approach <i>Anthony J. Booth</i>	719
Comparing Different Information Sources in a Multispecies Context <i>Gunnar Stefánsson</i>	741
Rapid Appraisal of the Status of Fisheries for Small Pelagics Using Multivariate, Multidisciplinary Ordination <i>Tony Pitcher, Steven Mackinson, Marcelo Vasconcellos, Leif Nøttestad, and David Preikshot</i>	759
Development of a Simple Biomass Analysis Model <i>Rex Baleña</i>	783
Multivariate Interdisciplinary Assessment of Small-Scale Tropical Fisheries <i>David Preikshot and Daniel Pauly</i>	803

Mass-Balance Food Web Ecosystem Models as an Alternative Approach for Combining Multiple Information Sources in Fisheries <i>Daniel Pauly, Johanne Dalsgaard, Thomas A. Okey, Robert Powell, and Stuart Pimm</i>	815
 Harvest Policy	
Estimates of Shrimp Trawl Bycatch of Red Snapper (<i>Lutjanus campechanus</i>) in the Gulf of Mexico <i>B.J. Gallaway, M. Longnecker, J.G. Cole, and R.M. Meyer</i>	817
A Summary of Assessment Information for Managing Alaska Groundfish Stocks <i>Jane DiCosimo</i>	841
Harvest Control for Schooling Fish Stocks under Cyclic Oceanographic Regimes: A Case for Precaution and Gathering Auxiliary Information <i>Marcelo Vasconcellos and Tony Pitcher</i>	853
Implications of a Bayesian Approach for Simulating Salmon Population Dynamics <i>Ryan A. Hill and Brian J. Pyper</i>	873
In Search of a New Approach to Fisheries Management in the Middle Amazon Region <i>Victoria J. Isaac, Mauro L. Ruffino, and David McGrath</i>	889
From Fisheries Assessment Uncertainty to Risk Analysis for Immediate Management Actions <i>Stratis Gavaris and Alan Sinclair</i>	903
Consistency of Stock Assessment and Evaluation of Fisheries Management for European Fish Stocks, 1983-1995 <i>D. Gascuel, G. Fontenelle, C. Maguer, and A. Biseau</i>	917
A General Approach for Making Short-Term Stochastic Projections from an Age-Structured Fisheries Assessment Model <i>Jon Brodziak, Paul Rago, and Ramon Conser</i>	933
A Simulation Study of the Effects of Aging Error and Sample Size on Sustained Yield Estimates <i>Lewis G. Coggins Jr. and Terrance J. Quinn II</i>	955

**The Effects of Artisanal Fisheries on Penaeid Shrimp Stocks
in the Gulf of Mexico**
Adolfo Gracia and Ana Rosa Vázquez Bader 977

**Fisheries Management Based on Reproductive Potential:
An Example for Chub Mackerel**
Toshio Katsukawa and Yoshiharu Matsumiya 999

Participants 1013

Index 1025
