Table of Contents

Part I - Planning the Project

Chapter 1: Buildings
2 General Description
4 Sizing and Layout
6 Insulation
11 Foundations
14 Accessories
18 Permits and Codes

Chapter 2: Refrigeration
19 Heat Loads
21 Machinery Options
23 Choosing a System

Chapter 3: Six Cold Storage Scenarios
25 Introduction
27 A. 8 x 10 Walk-in, 5,000 pounds
28 B. 14 x 20 Walk-in, 20,000 pounds
30 C. 38 x 40 Room, 200,000 pounds
32 D. 44 x 47 Room, 500,000 pounds
34 E. 72 x 74 Room, 1 million pounds
36 F. 110 x 136 Room, 4 million pounds
38 More Factors Affecting Costs
41 A Recent Project

Chapter 4: Some Rules of Thumb
42 Introduction
42 Sizing
42 Costs—Capital
44 Costs—Operating

Part II - Storing Frozen Products—A Look at Seafood Temperature and Shelf Life

Chapter 5: The Process of Quality Loss
45 Protein Denaturation
46 Oxidation Reactions
47 Enzyme Activity
47 Lipid Hydrolysis
48 Desiccation
Chapter 6: The Causes and Control of Quality Loss
49 Raw Material Quality
50 Holding Temperature
50 Temperature Fluctuation
51 Packaging
51 Reprocessing

Chapter 7: Recommended Frozen Storage Conditions
52 Time-Temperature-Tolerance
52 Recommended Holding Temperature
58 Temperature Control: Limits of Fluctuation
59 Packaging Recommendations
