Guidelines for Electronic Presentations

A laptop computer and projector will be available if you wish to give your presentation using PowerPoint or other presentation software. Bring either a zip disk or CD with all your material on it. Depending on where in the program you are scheduled, you will be able to load your presentation either before the morning or afternoon session. Someone will be assigned to assist you in loading your presentation.

For best results, follow the Guidelines for Presentation Graphics and be aware that visuals are best seen when there is maximum contrast between the type and background colors.
