

# Seafood Processing Leadership Training

## Alaska Seafood Processing Leadership Institute (ASPLI)

Registration is open through September 30, 2017 for the Alaska Seafood Processing Leadership Institute. The institute provides the technical training, leadership and management skills needed to succeed in the seafood industry.

The institute offers 80 hours of professional development in two sessions. The sessions are designed for mid-level managers in a seafood plant, such as assistant plant managers, production managers, quality control supervisors, seafood engineers, human resource managers and administrative personnel identified by their employer as having leadership potential.
