Join us for a comprehensive 3-day workshop that will teach you the essentials of shellfish farming in Alaska. Lead by the Alaska Sea Grant Marine Advisory Program this workshop second of two modules. This module concentrates on enhancement of Alaska native species of clams and farming of scallop, mussels, and a business management session. Co-sponsors are the Kachemak Shellfish Mariculture Association, Kachemak Bay Estuarine Research Reserve, and Islands and Oceans Center, Homer. The course is available at no cost.

The curriculum includes lectures, labs, guest speakers, and a full day field experience. One university credit is optional with completion of an assignment. For information on the course requirements and process for receiving this credit, please contact Ray RaLonde.

Learn from the experts about nearly every aspect of shellfish farming in Kachemak Bay led by Ray RaLonde, aquaculture specialist and Quentin Fong, business specialist for the Alaska Sea Grant Marine Advisory Program.

Course registration is available at:
