Southeast Alaska Shellfish Farming Workshop: Module II

May 20-22, 2015
Paul Building, Room 301, 2600 Seventh Avenue
University of Alaska Southeast Ketchikan, Alaska

- Join us for a comprehensive 3-day workshop that will teach you the essentials of shellfish farming in Alaska. Sponsored by the Alaska Sea Grant Marine Advisory Program, this workshop is the second of two modules. This module concentrates on farming Alaska native species of clams, scallop, mussels, and with advanced business management session. Cosponsors are the University of Alaska Fairbanks, University of Alaska Southeast, and OceansAlaska, Ketchikan. The Annette Island Fish and Wildlife Department will sponsor the field trip to Annette Island.

- The curriculum includes lectures, labs, guest speakers, and a full day of field experience. One university credit is optional with completion of an assignment. For information on the course requirements and process for receiving this credit, please contact Ray RaLonde. The course is available to all at no cost.

- Learn from the experts about nearly every aspect of oyster farming in Southeast Alaska led by Ray RaLonde, aquaculture specialist, Quentin Fong, business specialist, and Gary Freitag, Ketchikan Agent for the Alaska Sea Grant Marine Advisory Program. Experts for the aquaculture industry are Oceans Alaska staff and Perter Metcalf, director of the geoduck aquaculture project of the Goldbelt Corporation.

Course registration is available at:
